SKILLS

- Front-End Development
- Back-End Development
- Generative AI
- Prompt Engineering
- AI-Assisted Development
- Developer Tools
- Research & Analytical Skills
- Communication & Leadership

HOBBIES

- Artificial Intelligence & Emerging Technologies
- Website Development & Programming

PROFILE

Professional Overview

Computer Science student and aspiring Computer Scientist and Refugee Development Technologist with practical experience in front-end development, web technologies, and AI-assisted software development. Currently working as a Front-End Development Intern at CodeAlpha, while developing projects and strengthening skills in HTML, CSS, JavaScript, React.js, Tailwind CSS, Git, and GitHub. My interests extend to Generative AI, large language models, prompt engineering, machine learning, and emerging AI technologies, with a growing focus on AI engineering and software development.

Alongside my technical journey, I have experience in teaching, community engagement, youth empowerment, and leadership through education- and development-focused initiatives. I am particularly interested in the intersection of computer science, artificial intelligence, research, education, and humanitarian development, and aim to apply technology and analytical thinking to practical challenges and create meaningful solutions for underserved communities.

WORK EXPERIENCE

Protection Volunteer	Volunteer	Cox's Bazar, Chittagong.
January 2025 - June 2025		

EDUCATION

Post-secondary (technical & Vocational)	IT World Computer Training Center Cox's Bazar, Chittagong.
